# ACCEPTABLE USE OF INFORMATION AND COMMUNICATION TECHNOLOGY (ICT) AND TECHNOLOGY SERVICES

## **Background**

The District believes in the benefits that ICT can bring to support teaching, learning and daily operating activities. ICT and technology services supplied by the District will be used in an appropriate manner. This includes, but is not limited to computers, laptops, tablets, personal digital assistants, Internet of Things (IoT) and other personal technologies, use of the internet, intranet and electronic based services, in essence, any device whether it be District-supplied or personal that connects to the District's network. All District staff, students, parents, school councils and other select individuals who are given access to the District ICT and technology services are required to know and abide by this Administrative Procedure in order to ensure that District ICT is being used in a safe and responsible manner. The use of personal devices on non-District networks, when used in the school learning environment, is also subject to this Administrative Procedure.

All users are responsible for ensuring that they use the District ICT resources in an appropriate manner in accordance with Board policies and administrative procedures. District ICT and technology services must be utilized in a legal, ethical, responsible and professional manner consistent with the educational, informational and recreational purposes for which they are provided. Access to District ICT resources is a privilege, not a right, and may be withdrawn if individuals do not comply with the Board policies and administrative procedures governing the acceptable use of District ICT.
