

Students in the Certified Dental Assisting Program are happy to be able to provide services to our community in our Annual Spring Preventative Clinic. In order for the students to meet their clinical requirements, our clinic focusses on seeing children from ages 5 to 18 years old.

Our spring clinic consists of 2 appointments.

At the first appointment in April, the patient will have a complete checkup done by a local dentist.

At this appointment, the dentist will prescribe any treatment needed for that patient and the Certified Dental Assisting student will take radiographs (x-rays), if prescribed by the dentist. We then book the patient to come back in May to have their teeth cleaned.

During the May visits, an onsite hygienist and our Certified Dental Assisting students will complete the preventative procedures that have been previously prescribed by the dentist in April. These procedures will include *complete oral hygiene instruction, rubber cup polish, fluoride treatment and fissure sealants.*

The cost of our April appointment is **\$15/person** (*up to a maximum of \$45/family*) for the first visit, while the cost for the second visit will be dependent on what the dentist prescribes – for most children the May appointment has no cost, while for adults this visit is usually \$15 or \$30.

If you are interested in booking your child/children to come to see us this spring, please contact us at the College of the Rockies Dental Clinic **250-489-2751 ext. 3364** to book an appointment.

For more information, or if you have any questions or concerns, please feel free to contact me.
