

New PAC Fundraiser: Make It Sow!

We are all trying to foster a culture of conservation by implementing green technology and encouraging eco-friendly practices. The TM Roberts PAC is excited to announce that we have selected the fundraiser program from Make It Sow. They supply high quality garden and flower seeds, unique renewable coco starter soils, and Greenhouse Grower Kits. They do not use any **GMO seeds** and only use proven species that are grown for Canadian climates. They back up all their products with a 100% quality guarantee.

The program will run from **January 29th to February 12th**. Full-colour brochures with details on a variety of seeds, order forms, and collection envelopes will be sent home with your child early next week. See their products at www.makeitsow.com.

We are excited about this program as it provides excellent value for the end user and will help the PAC continue to raise funds for a new playground structure.

Additionally, the Make It Sow bonus program will plant trees on our behalf. For every 10 packages we sell they will plant 1 tree in Canada for us!

Now is a good time to tell neighbours, friends and relatives who want to grow flowers or gardens this spring about our new fundraiser. Any of these products make a great gift or donation.
